

MANUFACTURING

Testing & Design

Our design capabilities enable all research, development and testing operations to be conducted in direct association with our engineers and production managers.

Automated Cutting and Fabrication

Our automated fabrication centers provide precision cutting and fabrication of the frames, sashes and accessories. All functional and mechanical applications are precisely prepared to accept hardware and accessories guaranteeing an exact fit for all components and consistency in sizing on all manufactured products.

Extrusions

We extrude all of our profiles, making our products exclusive to **Window City**. Our investment in the latest technology allows us to produce the finest extrusions in the industry today, while maintaining quality control and design flexibility throughout the process. The end result guarantees our products are one of a kind in the window and door industry.
